Dear Tom,

Thank you for your e-mail. Thus far, we have not been contacted by other PRPs regarding putting a group together. While we are open to informal discussions with EPA regarding this matter, we frankly cannot justify the expense of putting together or leading a PRP group in light of the fact that there is no direct evidence connecting our client to the groundwater contamination.

If you would like to discuss our client's situation in more detail, I would be happy to set up a call.

Best Regards,

Dan

Dan,

Have there been any efforts to begin pulling a PRP group together? We expect to issue a special notice letter very soon. We would be happy to start informal or formal discussions with a group at any time to try to help interested parties hit the ground running. Please let me know how things stand and if there is anything you think EPA can do to help get things moving.

Tom Krueger
